

SENSORY MAP

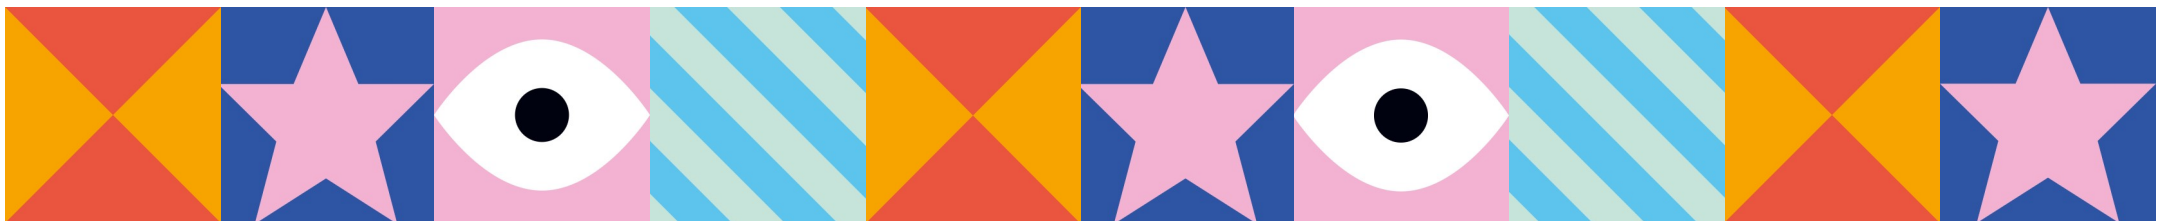

Our sensory map is designed to help visitors with sensory needs prepare for their visit to the museum.

Showtown is a fun and interactive museum and our galleries are vibrant and exciting. Each gallery has a mix of hands on and visual experiences.

Our sensory map includes sound and smells and any other display elements that may be a trigger for some visitors.

If you require any further information on any of our galleries or interactives, please do not hesitate to contact us or enquire on arrival to the museum.
